CORE STACK

React | TypeScript | Next.js | Tailwind CSS | Node.js | PostgreSQL | MongoDB | Web3 UX | Flutter | Dart | React Native | Machine Learning | Computer Vision | AI Annotator

HACKATHONS

Ika Hackathon: 2nd place with ClearSig.

HackJos 2025: 5th place with Script Business Management.

EDUCATION

Nigerian Army University, BSc Software Engineering, graduated 2026.

Pererat Timothy

Software Engineer & Product Builder

Software Engineer and Product Builder with 5+ years of experience delivering products across fintech, SaaS, web, mobile, Web3, agritech, and machine learning. Experienced in frontend architecture, Flutter mobile development, hardware integration, cloud infrastructure, and cross-functional product delivery.

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer

Jan 2026 to Present

DETALINKS TECHNOLOGY | Remote

- Build frontend experiences for DETALINKS TECHNOLOGY products ClearSig, a shared Web3 wallet, and Deta Wallet, a consumer wallet.
- Develop wallet onboarding, transaction, request, and approval flows, and integrate wallet functionality with backend and blockchain services.
- Contribute to frontend architecture and responsive interface standards.

Co-founder, COO & CTO

2026 to Present

GeoPonix | Remote

- Co-lead company, product, and engineering direction for precision-agriculture and agro-intelligence solutions.
- Serve as Hardware Engineer and Mobile Developer, building field hardware and mobile workflows for agricultural users.
- Connect field data collection with practical agro-intelligence software.

Co-founder & CTO

2026 to Present

Kenule Africa | Remote

- Drive technical planning and execution across the company's digital products.
- Translate product vision into scalable and maintainable engineering decisions.

ADDITIONAL EXPERIENCE

Frontend Developer Intern

Aug 2025 to Jan 2026

NHUD Foundation | On-site

- Developed and maintained responsive interfaces for the foundation's digital projects.
- Collaborated with design and backend teams to deliver features on schedule and improve accessibility.

STRENGTHS

- Frontend architecture for production web apps with clear component systems.
- Full-stack product development with Next.js, TypeScript, and pragmatic product thinking.
- Mobile product development with Flutter, Dart, React Native, and hardware integrations.
- Machine learning applications using computer vision, MediaPipe, and TensorFlow Lite.
- Web3 wallet interfaces, transaction approval flows, rapid prototyping, and team collaboration.
- Hardware integration and mobile workflows for precision agriculture.
