- AI Annotator

HACKATHONS

Ika Hackathon: 2nd place with ClearSig.

HackJos 2025: 5th place with Script Business Management.

EDUCATION

Nigerian Army University, Software Engineering, final year.

Pererat Timothy

Product-Focused Software Developer

Product-focused software developer with 5+ years of experience building frontend-heavy and full-stack web products across fintech, Web3, SME tooling, event platforms, and design systems. Strong in React, TypeScript, Next.js, Tailwind CSS, product architecture, and team collaboration.

EXPERIENCE

Head of Product Engineering / Frontend Lead

May 2026 to Present

[ClearSig](#) | [Remote](#)

- Lead product engineering for a Web3 shared wallet product for groups, families, and teams.
- Handled the complete frontend implementation for the ClearSig hackathon build.
- Helped the team secure 2nd place at the Ika hackathon.

Senior Frontend Developer

Jan 2026 to Present

[Deta Wallet](#) | [Remote](#)

- Lead frontend architecture and development for a consumer wallet product.
- Implement secure, responsive interfaces for financial transaction and wallet flows.
- Collaborate with backend and blockchain teams to integrate wallet functionality.

Senior Frontend Developer

2024 to 2025

[Uphouse](#) | [Remote](#)

- Led frontend delivery across multiple client projects with fast delivery cycles.
- Built reusable component libraries and responsive product interfaces.

SELECTED PROJECTS

ClearSig Shared Wallet Frontend Lead and Head of Product Engineering for shared wallet request, review, and approval flows.	FYB Studio Full-stack application for final-year students to personalize templates, preview designs, and export PNG assets.
WinView Microfinance Bank Digital-first MFB website for trust signals, account opening prompts, app prompts, and support access.	Script Business Management SME operations platform for sales, inventory, customers, analytics, and local business workflows.

STRENGTHS

- Frontend architecture for production web apps with clear component systems.
- Full-stack product development with Next.js, TypeScript, and pragmatic product thinking.
- Web3 wallet interfaces, transaction approval flows, rapid prototyping, and team collaboration.
